# Aactive HA PF

Sodium Hyaluronate 0.20%  
Preservative Free Eye Drops

10ml

## Instructions for use

Normally, lubrication of the surface of the eye is guaranteed by an adequate tear film, produced by the eye itself. Despite this, tear production may not be enough to ensure the comfort associated with normal function of eye structure.

It may be different causes, such as for example:

- Prolonged exposure to sunlight;
- Being in air-conditioned environments;
- Prolonged use of video terminals;
- Contact with detergent substances;
- Consequences post surgeries

In any event, in order to reduce the development of inflammation due to dry eye, it is advisable to reintegrate the tear film with biological substances like hyaluronic acid, thus fostering the eye's normal lubrication. Aactive HA PF 0.2% eye drops is a lubricating ophthalmic solution formulated to treat eye discomfort and for corneal protection.

Aactive HA PF has a high viscoelasticity, ensuring an excellent degree of hydration of the surface of the eye, thus alleviating the symptoms associated with dry eye syndrome.

The OSD (Ophthalmic Squeeze Dispenser) technology allows the innovative delivery of an absolutely sterile preservative-free ophthalmic solution.

## **INDICATIONS:**

Aactive HA PF 0.2% eye drops is indicated for the symptomatic treatment of dry eye syndrome.

Also indicated for corneal protection as a tear substitute.

## **METHOD OF USE:**

Administer one or two drops in each eye one or more times a day or as recommended by your physician. The product may also be administered for eye lubrication during use of contact lenses.

## **COMPOSITION:**

Hyaluronic acid sodium salt 0.2%, buffered isotonic solution pH 7.2.

## **WARNINGS:**

- Do not use the product if you are allergic to or have a known hypersensitivity to any of its ingredients.
- Close bottle tightly after use;
- Do not use the product 60 days after it is opened;
- Do not use the product after the expiration date indicated on the bottle;
- Keep away from heat sources and out of reach of children;
- Do not ingest;
- Do not use the product if the packaging has been compromised;
- In the event of adverse reaction, suspend use of the product and consult your physician;
- Take care that the tip of the bottle does not come into contact with the eye.
